1. Applicant is requested to cancel the non-elected claims in response to this action to expedite prosecution of the case.

2. Claims 7 and 9 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

3. Claims 7 and 9 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 9, the recitation "each of mirror surface portions" is indefinite in that such has not clearly been set forth in claim 1. Applicant should add a recitation into claim 1 concerning the mirror surface portions.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fukushima et al in view of Watanabe generally for reasons of record noting the following.

Applicant has amended the claims to recite "unitarily" formed concerning both the lens and the mold cores that make the lens. Presumably, "unitarily" formed means no more than what is already set forth in the specification—namely, that the cores and lens are single piece elements. However, arguments are drawn in the response to the extent

that while the cores, when assembled as the mold, and the lens, when mounted in the frame, may be considered to be single-piece items, they would not be considered to be “unitarily formed as a single piece”. While such may be true, it is generally well settled that forming molds or articles in a unitary manner would not effect the patentability of a mold or an article, and hence would not effect the patentability of a process which employs these molds or makes the articles.

5. Applicant's arguments filed September 24, 2003 have been fully considered but they are not persuasive. Applicant argues that making the mold cores and article as “unitarily formed” should patentably define over Fukushima et al. For reasons set forth in paragraph 4, supra, such is simply not persuasive. Making things unitarily basically means they are formed in one piece or out of one material. However, one of ordinary skill in the art would know how to modify a process to form a unitary article or modify apparatus so that mold cores are unitary. The art as applied is submitted to be properly combined since Fukushima et al (see abstract) is directed to making a lens array for a (laser) copier, printer or fax and Watanabe (see col. 1, lines 6-7) shows an optical system for a laser printer—the references certainly constitute analogous art. A recitation directed to forming the lens using mirror surface cores with mirror surface portions whose boundaries are formed as peaks –ie, what was initially claimed in the independent claim in the amendment of September 16, 2003 – would define over the art of record.

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
